PROFESSIONAL SUMMARY

Information Technology graduate focused on building responsive, tested web applications with React, TypeScript, JavaScript, and Tailwind CSS. Experienced in turning Figma designs into reusable UI components, managing client-side state and routing, and using AI-assisted workflows and prompt engineering to accelerate feature delivery, debugging, and automated testing.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap
Backend & Database: Supabase, PostgreSQL
Testing & AI Workflow: Vite, Vitest, React Testing Library, Playwright, Prompt Engineering, AI-Assisted Debugging & Testing
Tools & Design: Git, GitHub, Vercel, Figma, ClickUp, Adobe Photoshop, Canva

WORK EXPERIENCE

Supsoft Tech — *Frontend Developer Intern* **2026**

- Built the intern-facing web portal for an internal internship management system from Figma designs using React and Tailwind CSS.
- Implemented core features including daily attendance tracking (time-in/out, rendered hours calculation), document submission forms, and light/dark mode theming.
- Handled client-side routing, state management, form validation, and downloadable monthly PDF report exports using `jsPDF`.
- Worked with UI/UX designers, QA, and backend teammates in ClickUp, using AI-assisted debugging to quickly triage and fix frontend issues across testing cycles.

PROJECTS

Taktic | *React, TypeScript, Tailwind CSS, Supabase, Vite* [GitHub | Live Demo] **2025 – 2026**

- Built an installable PWA for daily planning, habit tracking, and focus timers with custom SVG progress rings and Web Audio API background sounds.
- Built an offline queue that saves local changes (tasks, habits, focus logs) for instant UI updates and automatically syncs them to Supabase once back online.
- Added shared accountability "Circles" with live activity feeds and friend invites using PostgreSQL functions and Row-Level Security (RLS).
- Used AI-assisted testing workflows to write Vitest and Playwright suites covering core date logic, offline-to-online syncing, and critical user flows.

Lumina | *React, React Router, Tailwind CSS, Gemini API, PWA* [GitHub | Live Demo] **2026**

- Built an offline-capable PWA for movie discovery combining TMDB metadata, regional streaming availability, and ratings from IMDb, Rotten Tomatoes, and Metacritic.
- Integrated a Google Gemini search assistant using structured prompt engineering to recommend movies from mood or plot descriptions, with rate-limit and offline fallbacks.
- Improved app responsiveness using in-memory API request caching, card hover prefetching, and lazy-loaded routes.
- Built a role-protected admin dashboard, cross-tab state syncing, and AI-assisted automated test suites with Vitest and React Testing Library.

EDUCATION

De La Salle University - Dasmariñas **2022 – 2026**
Bachelor of Science in Information Technology with specialization in Web Development

CERTIFICATIONS

- **Prompt Like an Engineer** — Cisco Networking Academy (Oct 2026)
- **Introduction to Modern AI** — Cisco Networking Academy (Oct 2026)
- **JavaScript Essentials 2** — Cisco Networking Academy (Oct 2026)
- **JavaScript Essentials 1** — Cisco Networking Academy (Sep 2026)
- **HTML Essentials** — Cisco Networking Academy (May 2026)
- **TOEIC Certificate** — Hopkins International Partners, Inc. (2026 - 2028)
- **Principles of Graphic Design** — University of the Philippines Open University (Apr 2024)

HONORS & ACHIEVEMENTS

- **Department of Science and Technology (DOST) Scholar** (2022 – 2026)
- **Dean's List** — De La Salle University - Dasmariñas (2022 – 2026)

ORGANIZATIONS

- **Multimedia Committee Member**, Computer Science & Information Technology Program Council (2023)
